- Control of Excess Gas
- Reduction of Bloating
- Controlling Stool Eating
- Controlling Hairballs
- Healthy Energy Levels

Digestive enzymes are very specific. They will only digest the exact food type that they are named for. For example lipase will digest only lipids or fats as they are commonly called. Lipase will not do anything to digest protein or carbohydrates. For complete digestion you must have a specific enzyme to digest each type of food ingredient. **A digestive product that contains only four, five or six enzymes will do a poor job digesting the complex ingredients of today's high quality pet food.**

That's why we at Ultra-Pet Products formulated **Total-Zymes®** with a **special blend of fourteen powerful vegetarian enzymes** to completely digest and deliver all the nutrients of today's modern pet diet on a cellular level. **One scoop of Total-Zymes® will digest one cup of any pet food.** In addition, we have added 120,000 FCCPU of bromelain from pineapples as a systematic enzyme.

Total-Zymes® helps promote healthy joints and tissues and is also great for skin, hair and nail support.

Total-Zymes® gives you a unique advantage not available from anyone else. We utilize **L.E.A.D.S.®** which stands for **"Live Enzyme Activated Delivery System®"** This special enzyme delivery system first used in human nutrition is now available for your pet. It insures nutrient delivery on a cellular level.

Total-Zymes® uses only human grade enzymes and patented amino acid chelated minerals to give your pet every advantage. For superior results use the companion pro-biotic supplement **Total-Biotics™** along with **Total-Zymes®** and give your pet every advantage for a long and healthy life.
