### **Our Immune System Is Not What It Used To Be!**

Over the past 50 years devitalized food sources and poor eating habits have robbed the body of the vital nutrients it needs to remain in optimal health. An increase in prescription medications, like antibiotics, coupled with daily exposure to chemicals, toxins and bacteria has helped to weaken the immune system of most people in this country.

### **These Facts Tell The Real Story!**

- 1950's- penicillin begins to lose some of its curative power.
- 1968- new strains of influenza in China rapidly spread across the globe.
- 1970's- sexually transmitted diseases rise to new levels.
- 1970's- Legionnaires' disease, Lyme disease and Ebola are discovered.
- 2000- infectious diseases continue to claim lives.
- 2001- germ warfare becomes a reality across the U.S.
- Today- medical authorities warn against the over use of antibiotics.
- 13 million people die from infectious diseases each year making it the 3rd leading cause of death in the U.S.

### **Mother Nature Always Provides A Solution!**

PRO-BIOTICS PLUS® combines some of nature's most effective immune strengtheners into one easy to swallow capsule. It is a collective effort to maximize our natural immune defenses! It rivals other products by combining the strongest immune enhancing properties found in nature into one complete formula that is further enhanced by a unique cellular absorption system for maximum protection. With this combination of vitamins, minerals, probiotics and other healthy nutrients you can super charge your immune system for protection against colds/flu, viruses and bacteria plus other diseases.

PRO-BIOTICS PLUS® uses only the highest quality ingredients with the strictest manufacturing standards for purity and efficacy without a high cost to you.

This is a formula you can trust. You'll begin feeling the results within days.

It's safe, all natural and there are no side effects.

To order or for more information visit us online at <http://www.digestivesplus.com> or call us at 323-822-0382

## Active Ingredient Overview

**Colostrum-** a special fluid secreted by the mammary glands of all mammals near the time of birthing rich in immune proteins, amino acids, lactoferrin, minerals, vitamins, enzymes, and growth factors that support the immune system. Colostrum is made up of nonspecific proteins such as thymosin alpha 1 and B4, insulin, insulin growth factor, antistaphylococcal factor and others. These proteins help in resistance to infectious diseases. These nutrients and immune factors enhance the immune system and stimulate cell growth and repair. Colostrum was designed by nature to promote strength and good health. Colostrum for human use is harvested from dairy cattle, as the components are identical to that of human colostrum, except that bovine colostrum is more concentrated. Colostrum from the first lactation is highest in immune proteins and transfer factors; NWC uses whole bovine colostrum from the first lactation of New Zealand disease-free cows that have not been fed chemicals, antibiotics, pesticides, or steroids.

"Bovine colostrum is biologically transferable to all mammals, including humans. It is much higher in immune factors than human mother's colostrum. Laboratory analyses of immune and growth factors from bovine colostrum are identical to those found in human colostrum, except that the levels of these factors are significantly higher in the bovine version." *(Dr. Zoltan Rona, American Journal of Natural Medicine)*

"Bovine colostrum has the same ability to regulate activity of the immune system as do the hormones of the thymus gland. It activates an under active immune system, helping it move into action against disease-causing organisms." *(Dr. Staroscik et al., Molecular Immunology)*

**Whole food Vitamin C from Amla Fruit-** also known as Indian gooseberry, is one of the richest natural sources of bioflavonoids and Vitamin C. Native to India, the plum sized fruit is revered for its anti-aging and immune enhancing properties. Each Amla fruit contains up to 700 mg of Vitamin C. The natural ascorbate is enhanced by the bioflavonoids and polyphenols contained in each fruit. In fact, researchers have shown that 8.7 mg of natural Vitamin C complex from Amla is equivalent to 100 mg of the most commonly used synthetic Vitamin C. *(Arora, R.B. Development of Unani Compounds from Herbal Sources, p234, 1985)*. Vitamin C is an essential water-soluble nutrient that plays several key roles in maintaining health and immunity because it fights free radicals, protects DNA and combats the effects of stress.

**MSM (Methylsulfonylmethane)-** is a naturally occurring sulfur compound found in our bodies as well as in many common beverages and foods, including milk, coffee, tea and green vegetables. In its purified chemical form, it is an odorless, essentially tasteless, white, water-soluble crystalline solid. It is one of the safest substances in biology, similar in toxicity to water. The human body is constantly building and repairing itself, using vitamins, minerals, proteins, etc., as construction materials. MSM is the cement that holds them together. Without enough MSM, cells become thin and tough, resulting in leathery tissues that trap toxins in, and oxygen and nutrients out. Many years of clinical use at Oregon Health Sciences University has demonstrated that MSM provides the following pain relief and anti-inflammatory benefits without serious side effects: inhibition of pain impulses, lessening of inflammation, reduction of muscle spasms, improved digestion and absorption of nutrients, improved regularity, increased oxygenation, higher energy levels, and healthier cells. NWC exclusively uses Lignisul MSM. Lignisul MSM is the first patented brand of MSM specifically developed as an ultra-pure food grade for human consumption as a nutritional supplement. Lignisul MSM is a non-animal-based nutritional supplement derived from pine trees. In addition, Lignisul has been certified Kosher-Parve by the Kosher Overseers Associates of America.

"MSM has an immune normalizing effect, as observed in some autoimmune diseases such as rheumatoid arthritis, lupus and scleroderma."

*Dr. Stanley W. Jacob M.D. excerpt from "The Miracle of MSM The Natural Solution for Pain.*

## Active Ingredient Overview

**Probiotics-** (including *Lactobacilli*, *Lactobacillus acidophilus* and *Bifidobacterium*) are organisms and substances that help improve the environment of the intestinal tract. These organisms produce acids (such as acetic acid and lactic acid) and other compounds, which inhibit the growth of "bad" bacteria and promote "good" intestinal flora. Science supports that an important first line of defense in immunity is intestinal flora. Consulting with Dr Khem Shahani, NWC included several strains of "good" bacteria in this formula, specifically chosen for their special benefits to the immune system. Along with preventing infective organisms from gaining a foothold in the GI tract, these strains of bacteria also enhance the activity of immune cells.

**Prebiotics- Fruitafit® Inulin IQ FOS (Fructooligosaccharides)-** one of the best-known prebiotics, is a class of simple carbohydrates found naturally in certain plants, such as Jerusalem artichokes, onions, and bananas. FOS is known to promote the growth of beneficial bacteria in the gastrointestinal tract. It has been shown to stimulate growth of bifidobacteria in the colon where many diseases first take root. Supplementing with FOS can greatly increase metabolic activity in the colon and help relieve constipation and reduce the production of intestinal putrefactive substances. Healthy colon function is vital to a properly functioning immune system.

**Beta Glucans-** have potent immune stimulating properties, which help with the production of macrophages, the large white immune cells that attack aberrant cells in the body and remove toxic debris. Beta glucans have also been shown to increase protection of the immune cells from the damage of radiation and chemotherapy treatments. Additionally, research indicates that they also are able to enhance the recovery of platelets and white blood cells after such treatments. Many in the medical community concede that the increase the microbial killing activity of leukocytes and immune function, as a result of supplementing with Beta glucans, suggests a clear effect on preventing against infections, activation of macrophages and tumorocidal activity.

"The broad spectrum of immunopharmacological activities of glucan includes not only the modification of certain bacterial, fungal, viral and parasitic infections, but also inhibition of tumor growth."  
(DiLuzio N.R. *Trends in Pharmacol.*)

**IP-6 (Inositol Hexaphosphate)-** a complex carbohydrate found in virtually all mammals, most cereals, nuts and legumes, and which is composed of the sugar inositol with six phosphate groups is a natural plant antioxidant. IP6 is one of the components of fiber that has been said to possess anticarcinogenic effects. Increased cellular levels of IP-6 have been linked to increased immune system activity. In addition, IP-6 appears to inhibit the growth of certain types of abnormal cells (cancer). Researchers have said that this potential new cancer-fighter, derived from fiber, may also prove to be medicine for the new millennium. Currently, there are a growing number of studies that support IP6's cancer-fighting properties. Additionally, IP6 has been shown to have potent antioxidant properties and to help treat kidney stones as well as high cholesterol and lipid levels. IP6 has no known toxic effects. Scientists have observed that cancer cells can revert back to normal cells in the presence of IP6.

"In recent studies, we have demonstrated that inositol hexaphosphate (InsP6) inhibits experimental colon carcinogenesis."  
(Baten A, Ullah A, Tomazic VJ, Shamsuddin AM, *Carcinogenesis*. 1989)

## Active Ingredient Overview

**Zinc-** is a trace mineral occurring in the body in larger amounts than any other trace element except iron. It serves many functions including acting as a constituent to at least 25 enzymes involved in digestion and metabolism. It aids in the absorption of many vitamins, especially the B complex. Zinc is very important for proper function of the thymus gland and thymus hormones, as well as cellular immunity. Research indicates that the health of the body's natural killer cells may be dependent on zinc intake for normal growth and development. Zinc has been shown to enhance the immune system, reduce excessive levels of free radicals, stimulate cell growth and tissue repair, and greatly contribute to overall health. Two capsules of PRO-BIOTICS PLUS® supplies 100% of the daily value of zinc.

**Live Enzyme Activated Delivery System® (L.E.A.D.S.®)** - Like all of NWC's products PRO-BIOTICS PLUS® contains our exclusive Live Enzyme Activated Delivery System®. It is NWC's delivery system that guarantees assimilation and utilization of the nutrients at the cellular level. The enzymes included in this system are naturally found in the body. However, with estimates of as many as 20 million Americans suffering from various digestive disorders, adding enzymes to the diet becomes essential. Without the proper level of enzymes, the digestive system becomes strained causing improper digestion, malabsorption of nutrients, allergic reactions and even poor wound healing; all of which have a negative effect on the immune system. This special blend of supplemental enzymes works to extract the nutrients from the formula in the most bioavailable form so the body can use them easily and efficiently.

## Supplement Facts

Serving Size: 1 Capsule

Servings per container: 60

	Amount per Capsule	% D.V.
Calcium (as Calcium Amino Acid Chelate)	20 mg	2%
Colostrum	250 mg	*
Whole food Vitamin C as Amla Fruit	100 mg	*
Probiotic blend	90 mg	*
Bifidobacterium longum	250 million CFU	*
Lactobacillus plantarum	250 million CFU	*
Bifidobacterium bifidum	200 million CFU	*
Lactobacillus casei	250 million CFU	*
Lactobacillus acidophilus	250 million CFU	*
Beta 1.3 Glucans	75 mg	*
MSM	50 mg	*
Fruitafit® Inulin IQ FOS	25 mg	*
L.E.A.D.S. A proprietary blend Amylase, Lipase, Cellulase	21 mg	*
IP6	2.5 mg	*
Zinc Chelazome™	0.60 mg	*
Copper Chelazome™	0.22 mg	*

\*Daily value (D.V.) not established

Other Ingredients: Gelatin and Water.

## About DigestivesPlus.com

Digestivesplus.com was created specifically to offer up to date information, resources and innovative products aimed at maintaining and improving digestive health. We focus on providing in-depth information on common digestive problems including constipation, diarrhea and Irritable Bowel Syndrome (IBS) including causes, symptoms and treatments. Digestivesplus.com also provides specific sections to discuss longer term management of digestive symptoms and strategies to improve overall digestive health in the relief & cure section.
